

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Purpose of the Tool

The International Civil Aviation Organization's (ICAO's) Annex 19 promotes a common approach to Safety Management across aviation domains; both for States and for organisations. The Safety Management International Collaboration Group (SM ICG) has developed the SMS Evaluation Tool in direct support to this common approach and accordingly, the following guidance explains the purpose, and methodology relevant to the use of the tool.

The tool evaluates the overall effectiveness of the SMS; as a function of both compliance and performance, through a series of indicators¹ based on ICAO Annex 19² and ICAO Safety Management Manual (doc 9859)³ and is organised by the ICAO SMS Framework. Each indicator should be reviewed to determine whether it is *Present*, *Suitable*, *Operating*, or *Effective*, using the definitions and guidance set out below.

This concept of evaluating SMS effectiveness supports the move from traditional, compliance-based oversight to performance-based oversight that focuses on how the SMS is performing. It provides a common baseline for SMS effectiveness evaluation that creates a sound basis for mutual acceptance of SMS.

When to Use the Tool

The evaluation tool is designed to be used by both CASA and by Organisations such as Part 119 AOC, Part 145 MOC, Part 141 ATOC and other organisations who are required to comply with CAR Part 100 requirements to maintain their organisational certification. CASA uses the tool for an initial approval or on-going oversight of an organisation. The organisations can use this tool to self-evaluate the maturity and effectiveness of their own SMS for the purpose of continuous improvement. The resulting evaluation could be presented to CASA to demonstrate their maturity of their SMS. Organisations may also use the tool to evaluate the SMS of other organisations that they interface with. Finally, organisations could use the tool as an SMS gap-analysis and accordingly develop an informed, forward-looking plan regarding further implementation.

CASA Surveillance

After initial implementation, the organisation should start using the SMS as part of its operations. PNG first mandated SMS via CAR Part 100 since 2011 and PNG Aviation organisations have continuously improved their SMS from Present/Suitable to Operating/Effective levels of maturity with ongoing surveillance by CASA evaluating whether the processes are Present, Suitable, Operating or Effective. In order to check that SMS processes, remain Operating and/or Effective, organisations should re-evaluate their SMS on a regular basis to determine how well it is performing.

The review should evaluate all of the items in the evaluation tool which can be done by a combination of organisational visits, meetings, and desktop reviews.

As an organisation's SMS processes mature and moves to *Operating* and *Effective*, the *Suitable* criteria may also need to be revisited. Changes to an organisation's approval may also require a reconsideration of the *Suitable* designation of the SMS processes. When significant changes take place, the Regulatory Authority may determine the need to review the existing evaluation to ensure it is still appropriate.

¹ The use of the term *indicator* in this tool should not be confused with the term "Safety Performance Indicator" used in Annex 19.

² ICAO Annex-19, Second Edition, July 2016, incorporating amendment 1.

³ ICAO Doc-9859 Safety Management Manual, Fourth Edition, 2018.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Credit for Other CASA Surveillance Activities

Valuable information about SMS effectiveness can be gained from other CASA surveillance activities. This may include such activities as routine CASA AOC, MOC or ATOC compliance audits and inspections, occurrence investigations, and/or meetings with the organisation. CASA may also consider giving credit when an organisation has received accreditation for meeting an industry standard.

In the context of CASA's performance-based and risk-based oversight, the results of the SMS evaluation is considered along with other data and information in the organisational risk profiling tool to determine future type, scope, and frequency of surveillance activities.

How to Use the Tool

Although the evaluation tool follows the SMS Framework in Annex 19 and CAR Part 100 Appendix A, the order of the components has been changed to start with Safety Risk Management. This is considered the most important component of an organisation's SMS and should therefore be given the most attention during the evaluation. In addition, a section dedicated to interface management has been added, to reflect Annex 19⁴.

However, users of the tool may choose to customise the order of the components to align it with the order of Annex 19. During the evaluation, the user may choose to start with any of the components due to the availability of personnel or resources, or to focus on a specific concern.

Users may decide to customise the evaluation tool to:

- Reflect organisational requirements;
- Reflect national SMS requirements or terminology; and/or
- Address a specific need that has been identified through the State Safety Programme (SSP).

The layout of the tool is shown below, with an accompanying legend defining the purpose of each box.

⁴ICAO Annex 19, Second Edition, July 2016, Appendix 2, note 2.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

- Present (P):** 4 7b There is evidence that the relevant indicator is documented within the organisation's SMS documentation.
- Suitable (S):** 4 7c The relevant indicator is suitable based on the size, nature, and complexity of the organisation and the inherent risk in its activity.
- Operating (O):** 4 7d There is evidence that the relevant indicator is in use and an output is being produced.
- Effective (E):** 4 7e There is evidence that the relevant indicator is achieving the desired outcome and has a positive safety impact.

Generally, *Present* and *Suitable* are used for initial approval or certification. *Operating* and *Effective* are expected to be found in a functioning SMS.

Due to the continuously changing and dynamic nature of aviation, during ongoing or subsequent evaluations the *Suitable* designation should be re-evaluated considering any changes to the organisation and its activities.

An item cannot be considered *Operating* or *Effective* if it is not *Present* and it cannot be considered as *Present* if it is not documented—documentation ensures consistent repeatable and systematic outcomes.

What to look for: 7a This section guides the evaluator when looking at each individual feature and is not meant to be a checklist. The items listed are not specific to an individual *Present*, *Suitable*, *Operating*, or *Effective* level, but remind the evaluator of areas they may want to consider. Some items in this column may not be relevant depending on the size, type, or nature of the organisation.

Evidence of SMS Evaluation

It is important that the evaluator records evidence of the evaluation. Evidence includes documentation, reports, and records of interviews and discussions. For example, for an item to be designated *Present* the evidence is likely to be documented only, whereas for an item to be designated *Operating*, the evaluation may involve evaluating records as well as face to face discussions with personnel within an organisation.

User Competencies

The tool should be used by staff with training and competency in:

- Safety Management Systems based on the ICAO SMS Framework;
- Auditing techniques;
- Interview techniques including communication skills;
- Understanding of the application of risk management;
- Appreciation of the difference between compliance and performance;
- Report writing techniques to allow narrative to be used to summarise the evaluation;
- Understanding of safety culture;
- Understanding of human factors; and
- State Safety Programme and State Safety Objectives.

It is recommended that as well as being SMS trained to use the tool in the classroom environment, staff are provided additional training during a live evaluation to familiarise themselves with the tool and its practical use.

CA01-AC100-1E

			Reports are processed within the defined timescales.	The reporting system is available for third parties to report (partners, suppliers, and contractors).
--	--	--	--	---

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	1.1.4	There is a process that defines how hazards are identified from multiple sources through reactive and proactive methods (internal and external).						
	1.1.5	The hazard identification process identifies human performance related hazards.						
	1.1.6	There is a process in place to analyse safety data and safety information to look for trends and gain useable management information.						
	1.1.7	Safety investigations are carried out by appropriately trained personnel to identify root causes (why it happened, not just what happened).						
Guidance	What to look for							
	- Review how hazards are identified, analysed, addressed, and recorded. - Review structure and layout of hazard log. - Consider hazards related to: - o Possible accident scenarios; - o Human and organisational factors; - o Business decisions and processes; - o Third party organisations; and - o Regulatory factors. - Review what internal and external sources of hazards are considered such as safety reports, audits, safety surveys, investigations, inspections, brainstorming, management of change activities, commercial and other external influences, etc. - Review whether safety investigations identify human and organisational contributing factors.							
	Present		Suitable			Operating		Effective
	There is a process that defines how hazards are identified through reactive and proactive methods. The triggers for safety investigations are identified.		Multiple sources of hazards (internal and external) are considered and reviewed, as appropriate. The data analysis process enables gaining useable safety information. Hazards are documented in an easy-to-understand format.			The hazards are identified and documented. Human and organisational factors related to hazards are being identified. Safety investigations are carried out and recorded.		The organisation has a register of the hazards that is maintained and reviewed to ensure it remains up-to-date. It is continuously and proactively identifying hazards related to its activities and the operational environment and involves all key personnel and appropriate

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

		The level of sign-off for safety investigations is defined and adequate to the level of risk.		stakeholders including external organisations. Hazards are continuously assessed in a systematic and timely manner. Safety investigations identify causal/contributing factors that are acted upon.
--	--	---	--	---

1.2 SAFETY RISK ASSESSMENT AND MITIGATION (Annex 19 element 2.2)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	1.2.1	There is a process for the management of risk that includes the analysis and assessment of risk associated with identified hazards expressed in terms of likelihood and severity (or alternative methodology).						
	1.2.2	There are criteria for evaluating the level of risk the organisation is willing to accept and risk assessments and ratings are appropriately justified.						
Guidance	What to look for							
	- Review the risk classification scheme and procedures. - Check that severity and likelihood criteria are defined (or that an alternative methodology is described). - Review whether risk assessments are carried out consistently. - Sample an identified hazard and review how it is processed and documented. - Review what triggers a risk assessment. - Check any assumptions made and whether they are reviewed. - Review how issues are classified when there is insufficient quantitative data available. - Check that the process defines who can accept what level of risk. - Check that the risk register is being reviewed and monitored by the appropriate safety committee(s). - Evidence of risk acceptability being routinely applied in decision making processes.							
	Present		Suitable			Operating		Effective
	There is a process for the analysis and assessment of safety risks. The level of risk the organisation is willing to accept is defined.		Severity and likelihood criteria are clearly defined and fit the service provider's actual circumstances. The risk matrix and acceptability criteria are clearly defined and usable. Responsibilities and timelines for accepting the risk are clearly defined.			Risk analysis and assessments are carried out in a consistent manner based on the defined process. The defined risk acceptability is being applied.		Risk analysis and assessments are reviewed for consistency and to identify improvements in the processes. Risk assessments are regularly reviewed to ensure they remain current.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

				Risk acceptability criteria are used routinely and applied in management decision making processes and are regularly reviewed.
--	--	--	--	--

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	1.2.3	The organisation has a process in place to make decisions and apply appropriate and effective risk controls.						
	1.2.4	Senior management have visibility of medium and high risk hazards and their mitigation and controls.						
Guidance	What to look for							
	- Risk controls consider human and organisational factors. - Evidence of risk controls being actioned and follow up. - Aggregate risk is being considered. - Check whether the risk controls have reduced the residual risk. - Risk controls are clearly identified. - Review the use of risk controls that rely solely on human intervention. - Check that new risk controls do not create additional risks. - Check whether the acceptability of the risks is made at the right management level.							
	Present		Suitable		Operating		Effective	
	The organisation has a process in place to decide and apply risk controls.		Responsibilities and timelines for determining and accepting the risk controls are defined.		Appropriate risk controls are being applied to reduce the risk to an acceptable level including timelines and allocation of responsibilities. Human Factors are considered as part of the development of risk controls.		Risk controls are practical and sustainable, applied in a timely manner, and do not create additional risks. Risk controls take Human Factors into consideration.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

2. SAFETY ASSURANCE (Annex 19 component 3)

2.1 SAFETY PERFORMANCE MONITORING AND MEASUREMENT (Annex 19 element 3.1)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	2.1.1	Safety performance indicators (SPIs) linked to the organisation's safety objectives have been defined, promulgated, and are being monitored and analysed for trends.						
Guidance	What to look for - Evidence that SPIs are based on reliable sources of data. - Evidence of when SPIs were last reviewed. - The defined SPIs and targets are appropriate to the organisation's activities, risks, and safety objectives. - SPIs are focused on what is important rather than what is easy to measure. - Consideration of any State SPIs. - Review whether any action has been taken when an SPI is indicating a negative trend (reflecting a risk control or an inappropriate SPI). - Evidence that results of safety performance monitoring are discussed at the senior management level. - Evidence of feedback provided to the Chief Executive.							
	Present		Suitable		Operating		Effective	
	There is a process in place to measure the safety performance of the organisation including SPIs and targets linked to the organisation's safety objectives and to measure the effectiveness of safety risk controls.		SPIs are focused on what is important rather than what is easy to measure. Reliability of data sources is considered in the design of SPIs. SPIs are linked to the identified risks and safety objectives. Frequency and responsibility for the trend monitoring of SPIs are appropriate. Realistic targets have been set. State SPIs are considered, as applicable.		The safety performance of the organisation is being measured and meaningful SPIs are being continuously monitored and analysed for trends.		SPIs are demonstrating the safety performance of the organisation and the effectiveness of risk controls based on reliable data. SPIs are reviewed and regularly updated to ensure they remain relevant. Where the SPIs indicate that a risk control is ineffective, appropriate action is taken.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
Evaluation	2.1.2	Risk mitigations and controls are being verified/audited to confirm they are working and effective.					
	2.1.3	Safety assurance takes into account activities carried out by all directly contracted organisations.					
Guidance	What to look for						
	- Evidence of risk controls being assessed for effectiveness (e.g., audits, surveys, reviews, SPIs and safety performance targets [SPTs], reporting systems). - Evidence of risk controls applied by contracted organisations being assessed and overseen (e.g., quality check, reviews, and regular meetings). - Information from safety assurance and compliance monitoring activities feeds back into the safety risk management process. - Review where risk controls have been changed as a result of the assessment.						
	Present		Suitable		Operating		Effective
	There is a process in place to assess whether the risk controls are applied and effective.		Responsibilities, methods, and timelines for assessing risk controls are defined. Contracted organisations are included in the safety assurance process.		Risk controls are being verified to assess whether they are applied and effective.		Risk controls are assessed and actions taken to ensure they are effective and delivering a safe service.

Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
Evaluation	2.1.4	Responsibilities and accountability for ensuring compliance with safety regulations are defined and applicable requirements are clearly identified in organisation manuals and procedures.					
	2.1.5	There is an internal audit programme including details of the schedule of audits and procedures for audits, reporting, follow up, and records.					
	2.1.6	Responsibilities and accountabilities for the internal audit process are defined and there is a person or group of persons with responsibilities for internal audits with direct access to the Accountable Manager.					
Guidance	What to look for						
	- Review how senior management ensure the organisation remains in compliance. - Review job descriptions for compliance responsibilities. - Evidence that senior management take action on internal and external audit results. - Review how independence of the internal audit function is achieved. - Review how the internal audit function interacts with: - o Senior management, - o Line managers, and						

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

	○ The safety management staff. - Assess the contents of the programme against any regulatory requirements.			
	Present	Suitable	Operating	Effective
	Responsibilities and accountabilities for compliance are defined. The organisation has an internal audit programme and procedures for audits, reporting, and records. A person or group of persons with responsibilities for internal audits has been identified and they have direct access to the Chief Executive.	The internal audit programme covers all applicable regulations and includes details of the schedule of audits. Independence of the internal audit function is achieved.	The compliance monitoring programme is being followed and regularly reviewed. All staff are aware of their responsibilities and accountabilities for compliance and to follow processes and procedures. Internal and external audit results are reported to the Chief Executive and senior management.	Individuals are proactively identifying and reporting potential non-compliances. The Chief Executive and senior management actively seek feedback on the status of internal and external audit activities.

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	2.1.7	After an audit, there is appropriate analysis of causal factors and corrective/preventive actions are taken.						
Guidance	What to look for							
	- Review the methods used for causal analysis - Check that the method is used consistently. - Review any repeat findings and check for actions have not been implemented or are overdue. - Check for timely implementation of actions. - Review senior management awareness of the status of significant findings and related corrective/preventive actions. - Check that appropriate personnel participate in the determination of causes and contributing factors. - Look for consistency between internal audit results and external audit results. - Review whether causal factors are considered as potential hazards.							
	Present		Suitable			Operating		Effective
	The process for the identification and follow-up of corrective/preventive actions are defined. The interface between internal audits and the safety risk management processes is described.		Responsibilities and timelines for determining, accepting, and following-up the corrective/preventive action are defined. Compliance monitoring includes contracted activities.			The identification and follow-up of corrective/preventive actions is carried out in accordance with the procedures including causal analysis to address root causes.		The organisation investigates the systemic causes and contributing factors of findings. The organisation proactively reviews the status of corrective/preventive actions. Effectiveness of the corrective/preventive actions is verified.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

			The status of corrective/preventive actions is regularly communicated to relevant senior management and staff.	
--	--	--	--	--

2.2 THE MANAGEMENT OF CHANGE (Annex 19 element 3.2)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	2.2.1	The organisation has a process to identify whether changes have an impact on safety and to manage any identified risks in accordance with existing safety risk management processes.						
	2.2.2	Human Factor (HF) issues have been considered as part of the change management process and, where appropriate, the organisation has applied the appropriate HF/human-centred design standards to the equipment and physical environment design.						
Guidance	What to look for							
	- Key stakeholders are involved in the process. - Review what triggers the process. - Review recent changes that have been through the risk assessment process. - Check that change is signed off by an appropriately authorised person. - Transitional risks are being identified and managed. - Review follow up actions such as whether any assumptions made have been validated. - Review whether there is an impact on previous risk assessments and existing hazards. - Review whether consideration is given to the accumulative effect of multiple changes. - Review that business-related changes have considered safety risks (organisational restructuring, upsizing or downsizing, IT projects, etc.). - Evidence of HF issues being addressed during changes. - Review impact of change on training and competencies. - Review previous changes to confirm they remain under control. - Consider how the changes are communicated to those people impacted by the change.							
	Present		Suitable		Operating		Effective	
	The organisation has established a change management process to identify whether changes have an impact on safety and to manage any identified risks in accordance with existing safety risk management processes.		Triggers for the change management process are defined. The process also considers business related changes and interfaces with other organisations/departments.		The change management process is being used and includes hazard identification and risk assessments with appropriate risk controls being put in place before a decision to make the change is taken.		The change management process is used for all changes that may impact safety, including HF issues, and considers the accumulation of multiple changes. It is initiated in a planned, timely, and consistent manner and includes follow up action that ensures the change was implemented safely.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

		The process is integrated with the risk management and safety assurance processes. Responsibilities and timelines are defined.	HF issues have been considered and been addressed as part of the change management process.	The change is communicated to those affected. Risk control and mitigation strategies associated with changes are achieving the planned effect.
--	--	---	---	---

2.3 CONTINUOUS IMPROVEMENT OF THE SMS (Annex 19 element 3.3)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	2.3.1	The organisation is continuously monitoring and assessing its SMS processes to maintain or continuously improve the overall effectiveness of the SMS.						
Guidance	What to look for							
	- Review the information and safety data used for management decision making and continuous improvement. - Evidence of: - o Lessons learnt being incorporated into SMS and operational processes; - o Best practices being sought and embraced; - o Surveys and assessments of organisational culture being carried out and acted upon; - o Data being analysed and results shared with Safety Committees; and - o Follow-up actions. - Information from external occurrences, investigation reports, safety meetings, hazard reports, audits, and safety data analysis all contribute towards continuous improvement of the SMS.							
	Present		Suitable			Operating		Effective
	There is a process in place to monitor and review the effectiveness of the SMS using the available data and information.		The SMS is periodically reviewed, and the review is supported by safety information and safety assurance activities. Senior management and different departments are involved. The decision making is data informed. External information is considered in addition to internal information.			There is evidence of the SMS being periodically reviewed to support the assessment of its effectiveness and appropriate action being taken.		The assessment of SMS effectiveness uses multiple sources of information including the safety data analysis that supports decisions for continuous improvements.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

3. SAFETY POLICIES AND OBJECTIVES (Annex 19 component 1)

3.1 MANAGEMENT COMMITMENT (Annex 19 element 1.1)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.1.1	There is a safety policy, signed by the Accountable Manager, which includes a commitment to continuous improvement; observes all applicable legal requirements and standards; and considers best practices.						
	3.1.2	The safety policy includes a statement to provide appropriate resources and the organisation is managing resources by anticipating and addressing any shortfalls.						
	3.1.3	There are policies in place for safety critical roles relating to all aspects of Fitness for Duty (for example, Alcohol and Drugs Policy or Fatigue).						
Guidance	What to look for							
	- Interview the Chief Executive to assess their knowledge and understanding of the safety policy. - Check that the safety policy is reviewed periodically for content and currency. - Confirm that the safety policy meets the requirements. - Interview staff to determine to what extent the safety policy is known, as well as how readable and understandable it is. - Review available resources including personnel, equipment, and financial. - There are sufficient and competent personnel. - Review planned resources versus actual resources. - Check how a positive safety culture is encouraged and impacts the overall effectiveness.							
	Present		Suitable			Operating		Effective
	There is a safety policy, signed by the Accountable Manager, which includes a commitment to continuous improvement; observes all applicable legal requirements and standards; and considers best practices. The safety policy includes a statement to provide appropriate resources.		The safety policy is easy to read. The content is customised to the organisation. There is a process for assessing resources and addressing any shortfalls.			The safety policy is reviewed periodically to ensure it remains relevant to the organisation. The organisation is assessing the resources being provided to deliver a safe service and taking action to address any shortfalls.		The Chief Executive is familiar with the contents of the safety policy and endorses it. The organisation is reviewing and taking action to address any forecasted shortfalls in resources.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.1.4	There is a means in place for the communication of the safety policy.						
	3.1.5	The Chief Executive and the senior management team promote a positive safety/just culture and demonstrate their commitment to the safety policy through active and visible participation in the safety management system.						
Guidance	What to look for							
	- Review how the safety policy is communicated. - Safety policy is clearly visible to all staff including relevant contracted staff and third-party organisations. - Question managers and staff regarding knowledge of the safety policy. - All managers are familiar with the key elements of the safety policy. - Evidence of senior management participation in safety meetings, training, conferences, etc. - Feedback from safety surveys that include specific just culture aspects. - Relationship with regulator and other stakeholders. - Review how a positive safety and just culture are promoted.							
	Present		Suitable			Operating		Effective
	There is a means in place for the communication of the safety policy. The management commitment to safety is documented within the safety policy.		The safety policy is clearly visible to all staff (consider multiple sites). The safety policy is understandable (consider multiple languages). The Chief Executive and the senior management team have a well-defined role in the safety management system.			The safety policy is communicated to all personnel (including relevant contract staff and organisations). The Chief Executive and the senior management team are promoting their commitment to the safety policy through active and visible participation in the safety management system.		People across the organisation are familiar with the policy and can describe their obligations in respect of the safety policy. Decision making, actions, and behaviours reflect a positive safety/just culture and there is good safety leadership that demonstrates commitment to the safety policy.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.1.6	The safety policy actively encourages safety reporting.						
Guidance	3.1.7	A just culture policy and principles have been defined that clearly identifies acceptable and unacceptable behaviours to promote a just culture.						
	What to look for - Evidence of when the just culture principles have been applied following an event. - Evidence of interventions from safety investigations addressing organisational issues rather than focusing only on the individual. - Review how the organisation is monitoring reporting rates. - Review the number of aviation safety reports appropriate to the activities. - Safety reports include the reporter's own errors and events they are involved in (events where no one was watching). - Feedback on just culture from staff safety culture surveys. - Interview staff representatives to confirm that they agree with just culture policy and principles. - Check that staff are aware of the just culture policy and principles.							
Guidance	Present		Suitable		Operating		Effective	
	A just culture policy and principles have been defined.		The just culture policy clearly identifies acceptable and unacceptable behaviours. The principles ensure that the policy can be applied consistently across the whole organisation. The just culture policy and principles are understandable and clearly visible.		There is evidence of the just culture policy and supporting principles being applied and promoted to staff.		The just culture policy is applied in a fair and consistent manner and staff trust the policy. There is evidence that the line between acceptable and unacceptable behaviour has been determined in consultation with staff and staff representatives.	

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.1.8	Safety objectives have been established that are consistent with the safety policy and they are communicated throughout the organisation.						
Guidance	3.1.9	The State Safety Programme (SSP) is being considered and addressed as appropriate.						
	What to look for - Assess whether the safety objectives are appropriate and relevant. - Objectives are defined that will lead to an improvement in processes, outcomes, and the development of a positive safety culture. - Assess how safety objectives are communicated throughout the organisation. - Safety objectives are being measured to monitor achievement through SPIs and SPTs. - Assess if the safety objectives have considered the State safety objectives in the SSP.							

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Present	Suitable	Operating	Effective
Safety objectives have been established that are consistent with the safety policy and there is a means to communicate them throughout the organisation.	Safety objectives are relevant to the organisation and its activities. Safety objectives are understandable and clearly visible. Safety objectives are aligned with the SSP.	Safety objectives are being regularly reviewed and are communicated throughout the organisation.	Achievement of the safety objectives is being monitored by senior management and action taken to ensure they are being met.

3.2 SAFETY ACCOUNTABILITY AND RESPONSIBILITIES (Annex 19 element 1.2)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.2.1	An Chief Executive has been appointed with full responsibility and accountability to ensure the SMS is properly implemented and performing effectively.						
	3.2.2	The Chief Executive is fully aware of their SMS roles and responsibilities in respect of the safety policy, safety standards, and safety culture of the organisation.						
Guidance	What to look for							
	- Evidence that the Chief Executive has the authority to provide sufficient resources for relevant safety improvements. - Evidence of decision making on risk acceptability. - Review SMS activities are being carried out in a timely manner and the SMS is sufficiently resourced. - Evidence of activities being stopped due to unacceptable level of safety risk. - Look for evidence that Chief Executive actions are consistent with the active promotion of a positive safety culture in the organisation.							
	Present		Suitable		Operating		Effective	
	An Chief Executive has been appointed with full responsibility and ultimate accountability for the SMS.		The Chief Executive has control of resources.		The Chief Executive ensures that the SMS is properly resourced, implemented, and maintained, and has the authority to stop the operation if there is an unacceptable level of safety risk. The Chief Executive is fully aware of their SMS roles and responsibilities. The Chief Executive is accessible to the staff in the organisation.		The Chief Executive ensures that the performance of the SMS is being monitored, reviewed, and improved.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.2.3	Safety accountabilities, authorities, and responsibilities are defined and documented throughout the organisation and staff understand their own responsibilities.						
Guidance	What to look for							
	- Question managers and staff regarding their roles and responsibilities. - Confirm senior managers are aware of the organisation's safety performance and its most significant risks. - Evidence of managers having safety related performance targets. - Look for active participation of the management team in the SMS. - Evidence of appropriate risk mitigation, action, and ownership. - The levels of management authorised to make decisions on risk acceptance are defined and applied. - Check for any conflicts of interest and that they have been identified and managed.							
	Present		Suitable			Operating		Effective
	The safety accountability, authorities, and responsibilities are clearly defined and documented.		Individuals have access to their safety accountability, authorities, and responsibilities (for example, through job descriptions or organisational charts).			Everyone in the organisation is aware of and fulfil their safety responsibilities, authorities, and accountabilities and are encouraged to contribute to the SMS.		The Chief Executive and the senior management team are aware of the risks faced by the organisation and SMS principles exist throughout the organisation so that safety is part of the everyday language.

3.3 APPOINTMENT OF KEY PERSONNEL (Annex 19 element 1.3)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.3.1	A competent safety manager who is responsible for the implementation and maintenance of the SMS has been appointed with a direct reporting line to the Chief Executive.						
	3.3.2	The organisation has allocated sufficient resources to manage the SMS including, but not limited to, competent staff for safety investigation, analysis, auditing, and promotion.						
Guidance	What to look for							
	- Review safety manager role including credibility and status. - Review the training that the safety manager has received. - Evidence of maintained competency. - Review how the safety manager gets access to internal and external safety information. - Review how the safety manager communicates and engages with operational staff and senior management. - Review the safety manager's workload/allocated time to fulfil role. - Check there are sufficient resources for SMS activities such as safety investigation, analysis, auditing, safety meeting attendance, and promotion. - Review of safety report action and closure timescales. - Interviews with Chief Executive and safety manager. - Check for any conflicts of interest and that they have been identified and managed.							
	Present		Suitable		Operating		Effective	
	A safety manager who is responsible for the implementation and maintenance of the SMS has been appointed with a direct reporting line to the Chief Executive.		The safety manager is competent. Sufficient time and resources are allocated to maintain the SMS.		The safety manager has implemented and is maintaining the SMS. The safety manager is in regular communication with the Chief Executive and escalates safety issues when appropriate. The safety manager is accessible to staff in the organisation.		The safety manager is competent to manage the SMS and identifies improvements in a timely manner. There is a close working relationship with the Chief Executive and the safety manager is considered a trusted advisor and given appropriate status in the organisation.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.3.3	The organisation has established appropriate safety committee(s) that discuss and address safety risks and compliance issues and includes the Chief Executive and the heads of functional areas.						
Guidance	What to look for							
	- Review safety committee and meeting structure and Terms of Reference for each committee/meeting. - Review meeting attendance levels. - Review meeting records and actions. - Check that outcomes are communicated to the rest of the organisation. - Evidence of safety objectives, safety performance, and compliance are being reviewed and discussed at meetings. - Participants challenge what is being presented when there is limited evidence. - Senior management are aware of the most significant risks faced by the organisation and the overall safety performance of the organisation.							
	Present		Suitable			Operating		Effective
	The organisation has established safety committee(s).		Safety committee(s)' structure and frequency supports the SMS functions across the organisation. The scope of the safety committee(s) includes safety risks and compliance issues. The attendance of the highest-level safety committee includes at least the Chief Executive and the heads of functional areas.			There is evidence of meetings taking place detailing the attendance, discussions, and actions. The safety committee(s) monitor the effectiveness of the SMS and compliance monitoring function by reviewing there are sufficient resources. Actions are being monitored and appropriate safety objectives and SPIs have been established.		Safety committees include key stakeholders. The outcomes of the meetings are documented and communicated and any actions are agreed, taken, and followed up in a timely manner. The safety performance and safety objectives are reviewed and actioned as appropriate.

3.4 CO-ORDINATION OF EMERGENCY RESPONSE PLANNING (Annex 19 element 1.4)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.4.1	An appropriate emergency response plan (ERP) has been developed and distributed that defines the procedures, roles, responsibilities, and actions of the various organisations and key personnel.						
	3.4.2	The ERP is periodically tested for the adequacy of the plan and the results reviewed to improve its effectiveness.						
Guidance	What to look for							
	- Review emergency response plan. - Review how coordination with other organisations is planned. - Review how ERP is distributed and where copies are held. - Interview key personnel and check they have access to the ERP. - Check that different types of foreseeable emergencies have been considered. - Review when the plan was last reviewed and tested and actions taken.							
	Present		Suitable		Operating		Effective	
	A coordinated ERP has been developed and defined.		Key personnel have easy access to the relevant parts of the ERP at all times. The ERP defines the procedures, roles, responsibilities, and actions of the various organisations and key personnel. The frequency and methods for testing the ERP are defined. The coordination with other organisations (including non-aviation organisations) is defined with appropriate means.		The ERP is reviewed and tested to make sure it remains up-to-date. There is evidence of coordination with other organisations as appropriate.		The results of the ERP review and testing are assessed and actioned to improve its effectiveness.	

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

3.5 SMS DOCUMENTATION (Annex 19 element 1.5)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	3.5.1	The SMS documentation includes the policies and processes that describe the organisation's safety management system and processes and is readily available to all relevant personnel.						
	3.5.2	SMS documentation, including SMS related records, are regularly reviewed and updated with appropriate version control in place.						
Guidance	What to look for							
	- Review the SMS documentation and amendment procedures. - Check for cross references to other documents and procedures. - Check availability of SMS documentation to all staff. - Check that staff know where to find safety-related documentation including procedures appropriate to their role. - Review the supporting SMS documentation (hazard logs, meeting minutes, safety performance reports, risk assessments, etc.). - Check how safety records are stored and version controlled. - Check appropriate staff are aware of the records control processes and procedures.							
	Present		Suitable		Operating		Effective	
	The SMS documentation includes the policies and processes that describe the organisation's SMS and processes. The SMS documentation defines the SMS outputs and which records of SMS activities will be stored. Records to be stored, storage period, and location are identified.		SMS documentation is readily available to all relevant personnel. SMS documentation is comprehensible. SMS documentation is consistent with other internal management systems and is representative of the actual processes in place. Data protection and confidentiality rules have been defined.		Changes to the SMS documentation are managed. Everyone is familiar with and follows the relevant parts of the SMS documentation. SMS activities are appropriately stored and found to be complete and consistent with data protection and confidentiality control rules.		SMS documentation is proactively reviewed for improvement. SMS records are routinely used as inputs for safety management-related tasks and continuous improvement of the SMS.

4. SAFETY PROMOTION (Annex 19 component 4)

4.1 TRAINING AND EDUCATION (Annex 19 element 4.1)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	4.1.1	There is a training programme for SMS in place that includes initial and recurrent training. The training covers individual safety duties (including roles, responsibilities, and accountabilities) and how the organisation’s SMS operates.						
	4.1.2	There is a process in place to measure the effectiveness of training and to take appropriate action to improve subsequent training.						
	4.1.3	Training includes human and organisational factors including just culture and non-technical skills with the intent of reducing human error.						
Guidance	What to look for							
	- Review the SMS training programme including course content and delivery method. - Check training records against the training programme. - Review how the competence of the trainers is being assessed and maintained. - Training considers feedback from external occurrences, investigation reports, safety meetings, hazard reports, audits, safety data analysis, training, course evaluations, etc. - Review how training is assessed for new staff and changes in position. - Review any training evaluation. - Check that the training includes human and organisational factors. - Ask staff about their own understanding of their role in the organisation’s SMS and their safety duties. - Check that all staff are briefed on compliance.							
	Present		Suitable			Operating		Effective
	There is an SMS training programme in place that includes initial and recurrent training.		The training covers individual safety duties (including roles, responsibilities, and accountabilities) and how the organisation’s SMS operates. Training material and methodology are adapted to the audience and include human factors. All staff requiring training are identified.			The SMS training programme is delivering appropriate training to the different staff in the organisation and is being delivered by competent personnel.		SMS training is evaluated for all aspects (learning objectives, content, teaching methods and styles, tests, etc.) and is linked to the competency assessment. Training is routinely reviewed to take feedback from different sources into consideration.

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	4.1.4	There is a process that evaluates the individual's competence and takes appropriate remedial action when necessary.						
	4.1.5	The competence of trainers is defined and assessed and appropriate remedial action taken when necessary.						
Guidance	What to look for - Review how competence assessment is carried out on initial recruitment and recurrently. - Check it includes safety duties and responsibilities, as well as compliance management.							
	Present		Suitable		Operating		Effective	
	A competency framework is defined for all personnel, including trainers.		There is a process in place to periodically assess the actual competency of personnel against the framework.		There is evidence of the process being used and being recorded.		The competence assessment programme and process is routinely reviewed and improved. The competence assessment takes appropriate remedial action when necessary and feeds into the training programme.	

4.2 SAFETY COMMUNICATION (Annex 19 element 4.2)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	4.2.1	There is a process to determine what safety critical information needs to be communicated and how it is communicated throughout the organisation to all personnel, as relevant. This includes contracted organisations and personnel where appropriate.						
	What to look for - Review the sources of information used for safety communication. - Review the methods used to communicate safety information (e.g., meetings, presentations, emails, website access, newsletters, bulletins, posters, etc.). - Assess whether the means of communication is appropriate. - The means for safety communication is reviewed for effectiveness and material used to update relevant training. - Significant events, changes, and investigation outcomes are being communicated. - Check accessibility to safety information. - Ask staff about any recent safety communication. - Review whether information from occurrences are timely communicated to all relevant personnel (internal and external) and has been appropriately disidentified.							

SAFETY MANAGEMENT SYSTEM (SMS) EVALUATION TOOL

ISSUED FOR USE
CA01-AC100-1E

Present	Suitable	Operating	Effective
There is a process to communicate safety critical information.	The process determined <i>what, when, and how</i> safety information needs to be communicated. The process includes contracted organisations and personnel where appropriate. The means of communication are adapted to the audience and the significance of what is being communicated.	Safety critical information is being identified and communicated throughout the organisation to all personnel, as relevant, including contracted organisations and personnel where appropriate.	The organization analyses and communicates safety critical information effectively through a variety of methods as appropriate to maximise it being understood. Safety communication is assessed to determine how it is being used and understood and to improve it where appropriate.

5. INTERFACE MANAGEMENT (Annex 19 Appendix 2 note 2)

Evaluation	Acceptable Means of Compliance and performance indicator		P	S	O	E	How it is achieved	Verification Evidence
	5.1.1	The organisation has identified and documented the relevant internal and external interfaces and the critical nature of such interfaces.						
Guidance	What to look for							
	- Review how interfaces have been documented. It may be included in a system description. - Evidence that: - o Safety critical issues, areas, and associated hazards are identified; - o Safety occurrences are being reported and addressed; - o Risk control actions are applied and regularly reviewed; and - o Interfaces are reviewed periodically. - Training and safety promotion sessions are organised with relevant external organisations. - External organisations participate in SMS activities and share safety information. - Check the identified interfaces (e.g., interfaces with aerodromes, airlines, Air Traffic Control [ATC], training organisations, contracted organisations, and the State).							
	Present		Suitable			Operating		Effective
	The organisation has identified and documented the relevant internal and external interfaces and the critical nature of such interfaces.		All relevant interfaces are addressed. The way the interfaces are managed is appropriate to the criticality in terms of safety. The means for communicating safety information is defined.			The organisation is managing the interfaces through hazard identification and risk management. There is an assurance activity to assess risk mitigations being delivered by external organisations.		The organisation has a good understanding of interface management and there is evidence that interface risks are being identified and acted upon. Interfacing organisations are sharing safety information and take actions when needed.
