Medical standards and certification - General

General

Civil Aviation Authority Advisory Circulars contain information about standards, practices, and procedures that the Director has found to be an Acceptable Means of Compliance with the associated rule.

An acceptable means of compliance is not intended to be the only means of compliance with a rule, and consideration will be given to other methods of compliance that may be presented to the Director. When new standards, practices, or procedures are found to be acceptable they will be added to the appropriate Advisory Circular.

This Advisory Circular also includes guidance material (GM) to facilitate compliance with the rule requirements. Guidance material must not be regarded as an acceptable means of compliance.

Purpose

The Advisory Circular provides details on general requirements related to Part 67 Medical standards and certification.

Related Rules

This Advisory Circular relates specifically to Civil Aviation Rule Part 67.

SUBPART B – Medical certification

Rule 67.55 Applications for medical certificates

Rule 67.55(b)(i) provides for an equivalent form of photographic identification.

The equivalent forms of photographic identification that are acceptable to the Director are:

- A valid and current PNG or foreign passport
- A valid and current PNG Driver's Licence
- A valid and current photographic national identity document issued by a foreign State

SUBPART D – Designated Aviation Medical Examiners

Rule 67.153 Medical examiner certification requirements

Rule 67.153(a)(2) requires a person applying for a medical examiner certificate to have successfully completed aviation medicine training acceptable to the Director.

The aviation medicine training that is acceptable to the Director includes any of the following:

- Completion of a post-graduate Diploma of Aviation Medicine from either the University of Otago or the Royal College of Physicians (London); or
- Completion of both the aviation physiology and clinical aviation medicine papers offered on a post-graduate basis by the University of Otago; or
- Completion of MD Aviation Medicine from the University of Medical Sciences, Bangalore, India; or
- Board Certification in Aviation Medicine (USA); or
- Australia Certificate of Civil Aviation Medicine (ACCAM), Monash University, Australia; or
- IAASM- SAA Certification in Aviation Medicine for Medical Examiners and Assessors (ICAO Compliant Training Package), Singapore Aviation Academy (SAA).

Rule 67.153(a)(3) requires a person applying for a medical examiner certificate to demonstrate an awareness of aviation regulatory medicine and the conditions in which applicants for medical certificates are employed.

The aviation medicine regulatory awareness training that is acceptable to the Director includes any of the following:

- DAME Workshop conducted by CASA PNG is acceptable for the purpose of this rule.
Rule 67.173 Designated Aviation Medical Examiner competencies

Competencies required to be demonstrated for issue of medical examiner instrument of appointment (IOA) by the Director

To be eligible for the issue of a medical examiner certificate, an applicant must, in addition to satisfying other general requirements, demonstrate competence in performing the functions of a medical examiner. The functions are established in the Civil Aviation Act 2000.

There are four generic competence categories: identification, assessment, management, and audit/review.

Notes:
• For the holders of Medical Examiner Grade 2 Instrument of Appointment, the competencies relate to the conduct of examinations for the purpose of issuing a Class 2 medical certificate.
• For the holders of Medical Examiner Grade 1 Instrument of Appointment, the competencies relate to the conduct of examinations for the purpose of issuing a Class 1, 2 or 3 medical certificate.

The competencies are set at 3 levels as follows:

Familiar theoretical knowledge of the subject only
Practiced actual practical experience such that the person could operate under supervision
Expert the person can operate without supervision and could supervise others.

The table below describes each competency and lists the competency level required of the holders of Medical Examiner Grade 1 IOA and Medical Examiner Grade 2 IOA.

SUBPART E – Operating Requirements for Medical examiners

Rule 67.203  Continued Compliance

Rule 67.203(a)(5) requires that a person who holds a medical examiner certificate must attend ongoing training courses in aviation medicine and aviation regulation, as may reasonably be required by the Director.

Attendance at the PNG DAME workshop run by CASA annually would satisfy the above.

THE SPECIMEN EXPOSITION

This specimen Exposition has been prepared to provide policy and procedural guidance to those Aviation Medical Examiners (AMEs) wishing to obtain delegation approval from the Director. The contents relate directly to the requirements of Rule Part 67.161.

The text of this guide has been arranged so that each subject is dealt with insofar as the CA Act, CAR Part 67 and advisory circulars defines it. The "Notes" which explain the recommended text and suggest ways in which the DAME might expand it to suit his/her own purposes. It will be appreciated that no single specimen Exposition can meet the needs of all types and sizes of surgery/practices or, indeed, reflect the different organisational structures and corporate policies, which emerge as companies develop.

The guidance given has been expanded by including a suitable text or procedure wherever possible. It must be appreciated that this is not the only method of compliance and may, in fact, be unsuitable for some organisations. Its purpose is only to illustrate the nature of the information required.

DAME EXPOSITION

PART 1

MANAGEMENT
1.1 CORPORATE COMMITMENT BY THE MEDICAL EXAMINER.

DAME EXPOSITION.

This Exposition and any associated referenced manuals defines the organisation and procedures upon which the Designated Aviation Medical Examiner delegation is based as required by rule part 67.161.

These procedures are approved by the undersigned and must be complied with, as applicable, when work/orders are being progressed under the terms of the DAME delegation.

It is accepted that these procedures do not override the necessity of complying with any new or amended rule published by the Director from time to time where these new or amended rules are in conflict with these procedures.

It is understood that the Director will approve this Medical Surgery whilst the Director is satisfied that the procedures are being followed and work standards maintained. It is further understood that the Director reserves the right to suspend, limit or revoke the DAME delegation if the Director has evidence that procedures are not followed or standards not upheld.

Signed.......................................................

Dated………………………

DAME ................... (Signature) ...............................

For and on behalf of.........................….  (quote organisation’s name) .............

NOTES :- (not for inclusion in the Exposition)

1. This statement satisfies the intent of rule 67.153 & 161(a)(1).

2. Any modification to the statement must not alter its intent.

3. Whenever the DAME is changed it is important that the new DAME signs the statement at the earliest opportunity as part of his/her acceptance by the Director.
Note: Chapters 1.2 to 1.7 are self-explanatory and each DAME should provide a simple account of the how they manage each subject within the context of their medical surgery practice.
NOTES :- (not for inclusion in the Exposition)

1. This specimen exposition is to provide guidance on an acceptable path to compliance with the CAR Part 67.161 requirements. In each case subject headings in the table of contents are suggested in which the particular nature of the organisation’s actual procedures should be defined. Subject headings should be deleted if they do not apply and others may be included if that is the most suitable method of describing the particular organisation.

2. TO REDUCE THE SIZE OF THIS DOCUMENT THE REMAINING SUBJECTS ARE NOT ALLOCATED INDIVIDUAL PAGES AS IN PART 1. IT IS RECOMMENDED, HOWEVER, THAT THE FORMAT OF PART 1 IS ADOPTED FOR THE WHOLE EXPOSITION, IN ORDER TO FACILITATE FUTURE AMENDMENT.
